</tbody>
</table>

Now you will see a full-screen map for the 1st floor.
Call Numbers

The Loan Shelves book you want has a call number that starts with “R.” So it will be on the first floor of the library. When you see the call number in the online catalog, it will look like this: RJ496.C67 W43 2004

When you find the book, the call number on the spine of the book will look like this:

RJ
496
.C67
W43
2004

When you search for the book:
► look first for the area with all the books that begin with “R”
► the “R” books will be in order by the first line of the call number, such as “R,” then “RC,” then “RJ”
► when you find the “RJ” books, look at the second line until you find the number 496
► continue searching line by line until you find the book you want
► if you have problems, ask any library staff member for help

A call number not only is the address of a book, it also serves to arrange books by subject. For example, books with the call number RJ 496 .C67 are about communicative disorders in children. Books with the call number RJ 496 .A6 are about aphasia in children. When you find one good book, you may browse the shelf around it for other books that might interest you.

Browsing Library Shelves

If you browse the shelves for books that begin with the call number “R,” you may see some subject areas that interest you:

RC: Internal medicine. Practice of medicine
RC 321 – RC 571: Neurology and psychiatry
RC 423 – RC 429: Speech and language disorders
RC 424: Stuttering
RC 424.7: Articulation disorders
RC 425 - RC4 25.7: Aphasia
RC 815.2: Ingestion and Deglutition disorders
RF: Otorhinolaryngology
RF 286 – RF 320: Deafness
RF 510 - RF 540: Voice disorders
RJ: Pediatrics
RJ 496.A6: Aphasia, pediatric
RJ 496.S7: Speech disorders, pediatric
RJ 496.S8: Stuttering, pediatric
RT: Nursing
Most of the books in the Cornette Library are arranged by the Library of Congress (LC) Classification system. You may see an outline of LC call numbers at [http://www.loc.gov/catdir/cpso/lcco/](http://www.loc.gov/catdir/cpso/lcco/)

A short guide to understanding call numbers is at:
[http://home.honolulu.hawaii.edu/~rob/Anth200Menu/DOCS/14/callno.html](http://home.honolulu.hawaii.edu/~rob/Anth200Menu/DOCS/14/callno.html)

**Understanding Call Numbers**

Have you ever wondered how library books are assigned their places on the shelves? Did you know that the call number -- the number placed on the spine of the book -- is a code which provides valuable information about the book? This page will provide an introduction to understanding and using library call numbers.

**Note:** this page relies upon a series of graphics. If your Web browser does not support graphics or tables, please use our text-only version of "Understanding Call Numbers".

If you'd like a printed copy of this information, ask your librarian for Pathfinder 6.

**What are call numbers for?**

Each book in the library has a unique call number. A call number is like an address: it tells us where the book is located in the library.

Call numbers appear on the spines of books and in the online catalog.

\[
\text{LB 2395 .C85 1991} \quad \text{LB2395 .C85 1991}
\]

*Note that the same call number can be written from top-to-bottom, or left-to-right.*

Honolulu Community College Library, like many academic libraries in the U.S., uses Library of Congress Classification for call numbers. This system uses a combination of letters and numbers to arrange materials by subjects.

**Reading Call Numbers**

Read call numbers line by line:

\[
\text{LB}
\]

Read the first line in alphabetical order:

\[
A, B, D, E, F, \ldots, L, A, L, B, E, M, M, \ldots
\]
